SUMMARY

Zoho Developer and AI-automation builder with hands-on experience across the full Zoho ecosystem (Creator, CRM, Campaigns, Payroll, People, Expense, Backstage, Billing, Analytics, Cliq, Agent AI) and modern full-stack development (React, NestJS, FastAPI, PostgreSQL). Currently building multi-tenant SaaS platforms and AI-assisted internal tools at iValue Systech, combining Deluge scripting and custom app development with client requirement analysis, solution design, documentation, and demos. Backed by a Cybersecurity BTech and prior VAPT/ethical-hacking internship experience.

EDUCATION

GLS University — BTech in Computer Science (Cyber Security)

2023 – 2026 (Expected) | SGPA: 8.95 | 6th Rank

Government Polytechnic, Ahmedabad — Diploma in IT Engineering

2020 – 2023 | CGPA: 9.42

EXPERIENCE

Web Developer / Zoho Solutions Engineer — iValue Systech Pvt. Ltd. (Feb 2026 – Present)

Delivered custom Zoho Creator applications — Warehouse Management, ShiftSync HRMS, Attendance Management, Asset Management, FMS Engineer App, Courier Zone Automation, Stationery Management, and Payroll — across forms, workflows, Deluge scripting, widgets, and role-based permissions.

Architected and presented IValue WMS, a multi-tenant IT-asset lifecycle platform (React 18/TypeScript, NestJS/Prisma, PostgreSQL, Redis/BullMQ, S3-compatible storage) featuring an append-only billing ledger, versioned rate cards, a business-hours-aware SLA engine, and per-device ITAD certification.

Built ShiftSync, a standalone React + Supabase attendance and shift-rostering app deployed on Cloudflare Pages, as a zero-license-cost alternative to Zoho People for staff working dynamic, multiple shifts.

Ran client requirement gathering, gap analysis, and solution demos across CRM, Campaigns, Marketing Automation, Payroll, People, Expense, and Backstage engagements for clients spanning logistics, hospitality, and manufacturing.

Authored SOPs, integration guides, plan-comparison documents, and case studies; explored AI-assisted workflows with Zoho Agent AI, Claude API, and Claude Code (task bots, HR assistant, duplicate-receipt detection).

Penetration Tester — Deltaware Solutions (Jun 2025 – Jul 2025)

Hands-on penetration testing and vulnerability assessment work on client-facing systems.

Software Development Intern (IoT & Django) — InfoLabz (Nov 2022 – Mar 2023)

Web application and back-end development, building the software-engineering foundation behind later full-stack projects.

Ethical Hacker — Waytowebs Solutions (Mar 2022 – Apr 2022)

Early hands-on exposure to ethical hacking practices, OSINT, and web application security testing.

PROJECTS

iValue WMS — Warehouse Management Platform (iValue Systech)

Multi-tenant IT-asset lifecycle platform covering receive, inspect, store, deploy, retrieve, repair/resell, and dispose workflows, with tenant isolation enforced server-side and an append-only ledger that turns warehouse operations directly into billing data.

Stack: React, TypeScript, NestJS, Prisma, PostgreSQL, Redis, BullMQ, AWS S3.

ShiftSync (iValue Systech)

Standalone attendance and shift-rostering app with geofenced check-in/out, leave management, and payroll export, built as a zero-license alternative to Zoho People.

Stack: React, Supabase, Cloudflare Pages.

PitaJi Finance Manager

Unified dashboard tracking Indian financial holdings (FDs, RDs, PPF, mutual funds, stocks, gold, insurance, loans) with an ITR/capital-gains calculator, OCR-based FD receipt scanning, and a rule-based finance chatbot.

Stack: FastAPI, MongoDB, React.

IT Asset Management Platform (iValue Systech)

Multi-tenant asset-tracking platform with 5 role tiers, 140+ API routes, full asset lifecycle management (bulk import, QR labels, transfers, reservations), and a Slack-based scheduler for warranty/maintenance alerts.

Stack: FastAPI, MongoDB, React.

LinkGuard

Phishing-detection scanner analyzing URLs and email headers for brand impersonation, sender-domain mismatches, and risky attachments, producing a 0–100 risk score.

Stack: Python, Flask, SQLAlchemy.

Vulnerability Assessment Platform

Self-hosted VA platform combining Python-based web/network scanning (nmap, OWASP ZAP) with CVSS/EPSS/CISA-KEV risk scoring, findings triage, and OWASP Top 10/PCI-DSS/ISO 27001 compliance mapping. Added an AI security copilot and attack-chain synthesis using the Claude API, plus CSRF/CSP hardening and a one-command Docker deployment.

Stack: PHP, Python, MySQL, Claude API.

Maninagar 3D

3D walkthrough of a stylized Ahmedabad crossroads with first-person movement; four interactive banks let you open accounts, deposit/withdraw, and open Fixed Deposits with real slab interest rates and compound-interest maturity calculations.

Stack: React, Three.js, Vite.

IoT Security System (BTech) / Safety and Security for Home and Industries (Diploma)

Built intrusion-alert systems using Arduino and sensors, triggering real-time buzzer/email alerts for home and industrial environments, including gas-leak and fire detection.

ACHIEVEMENTS

Research: Co-authored CSRF vulnerability research with Dr. Tejas Bhatt using DVWA, analyzing attack execution and mitigation strategies. (2025)

2nd place — IoT-Based Hackathon.

Active in GLS University Cybersecurity Club and CTF competitions (WWCTF 2025), including DEF CON Ahmedabad meetups.

Defined IValue Systech's Zoho-consulting USP and identified new client-acquisition channels as part of business-development work.

SKILLS

Zoho Ecosystem: Creator, CRM, Campaigns, Marketing Automation, Payroll, People, Expense, Backstage, Billing, Books, Analytics, Forms, Cliq, Agent AI, Deluge Scripting

Languages: Python, TypeScript, JavaScript, C++, Java, SQL, Dart, HTML, CSS, PHP

Frameworks & Data: React, Three.js, NestJS, FastAPI, Prisma, PostgreSQL, MySQL, MongoDB, SQLAlchemy

AI & Automation: Claude API, Claude Code, Zoho Agent AI, MCP

Cloud & DevOps: Vercel, Railway, Cloudflare (Pages, R2), Supabase, AWS S3, Redis, BullMQ

Security Tools: Burp Suite, OWASP ZAP, Nikto, Wireshark, Nmap, Kali Linux, Cisco Packet Tracer

Soft Skills: Client Requirement Analysis, Solution Design, Technical Documentation, Stakeholder Demos, Active Listening, Critical Thinking, Problem Solving

CERTIFICATES

Cybersecurity Analyst Job Simulation — Forage

Ethical Hacker Course — Cisco

Foundations of Cybersecurity — Google

Digital Forensics Masterclass — Udemy
