

Dhanesh Maloo

dhaneshmaloo09@gmail.com/+917016753260/tryhackme/linkedin / github

Aspiring Software & Automation Developer with experience in application development, scripting, APIs, and workflow automation. Skilled in Python, SQL, and web technologies with strong interest in business process automation platforms.

Education:

- GLS university, **BTech in Computer Science (Cyber Security)**: SGPA: 8.95, 6th Rank 2023 – 2026
- Government Polytechnic-Ahmedabad, **Diploma in IT Engineering**: CGPA: 9.42 2020 – 2023

Projects:

- **Vulnerability Assessment of Web Systems (Btech)** :
Conducted penetration testing on web applications using Python language and OWASP ZAP, SQLMap and other tools libraries. Identified OWASP Top 10 vulnerabilities and created risk-based assessment reports (Nikto) to guide mitigation.
- **Phishing Link Email Scanner (Btech)** :
Developed a Python-based tool to detect phishing URLs in emails using Regex, URL reputation APIs, and basic machine learning. Enhanced email security awareness and automated threat detection **IoT Security System** Built an intrusion alert system using IoT sensors and Arduino triggered alarms via buzzer and email.
- **Safety and Security for Home and Industries (Diploma)** :
Developed an IoT-based security system using Arduino and sensors to detect intrusions and natural hazards like gas leaks and fire. Implemented real-time alerts via buzzer and email for rapid response in home and industrial environments.

Internship:

- At Deltaware Solutions as **Penetration Tester** June 2025
- At Infolabz company as **Software Developer** July 2022
- At Waytoweb Pvt Ltd. as **Ethical Hacker** Jan. 2022

Skills:

Languages: C++, Python, Java, SQL, Dart, HTML, CSS, JavaScript and PHP

Tools: Burp-Suite, Nikto, Wireshark, Nmap, CISCO packet-tracer, Kali Linux, Zap

Soft-Skills: Active Listener, Critical Thinking, Problem Solving, Communication.

Achievement:

- Conducting research on Cross-Site Request Forgery (CSRF) vulnerabilities using DVWA to analyze attack execution and defense mechanisms. Exploring mitigation strategies to enhance web application security. 2025
- Dr. Tejas Bhatt, Dhanesh Maloo
- 2nd place in IoT-based Hackathon.

Certificates:

- Cybersecurity Analyst Job Simulation — Forage
- Ethical Hacker Course — Cisco
- Foundations of Cybersecurity — Google
- Digital Forensics Masterclass – Udemy
